

CompX eLock
revolutionizing *electronic access control*

CompX eLock® Membrane Keypad

Introducing the first field upgradeable CompX eLock® with a membrane keypad. Customize the keypad and increase its security by adding a pod – for magstripe or prox cards.

There's nothing else like the CompX eLock® – a keyless, standalone, electronic access control system.

CompX eLock® Membrane Keypad

- ➔ No cutouts needed for 6x2 keypad.
- ➔ **Note:** 1.25" x .25" slot is needed to pass ribbon cable through mounting surface.
- ➔ **Keypad dimensions: 6" wide by 1.5" high**

Be in control with CompX eLock®

There's nothing like the CompX eLock®, a keyless, standalone electronic access control lock. The eLock can be used in many applications – medication & narcotics carts, drug & supply cabinets, key control boxes, medical & personnel records cabinets – *anywhere access control is needed or required.*

Since the CompX eLock® is a keyless system, there are no keys to lose or to share. The eLock comes with 250 user codes, giving up to 250 users an individual access method – PIN (personal identification number), magstripe ID card, or proximity ID card. The membrane keypad resists common spills.

Use existing identification cards. The CompX eLock® reads magstripe Track 2 and HID® cards, eliminating the need to buy new cards. Since the eLock has a non-volatile memory, all stored information (users, supervisors, audit trails, etc.) is safe.

features

- 250 user/supervisor codes
- Flush mounted telephone style (3x4) or elongated (6x2) membrane keypads available
- Audit trail of last 1500 access attempts with date, time and user name
- Motor driven latching mechanism
- Battery pack options; Alkaline batteries recommended; not included
- Audible alarm bolt system
- Standard RJ11 communications port for audit trail download

options

- LockView® software
- Power pack (120V or 230V)
- RJ11 / USB converter for LockView® Windows™ software
- Embedded Security Data:
 - Serial number
 - Two reset codes to delete supervisors and users
 - Pass code prevents unauthorized LockView® use

Adding and deleting users can be done right at the unit or through optional LockView® software.

LockView® software

LockView® makes it easy to monitor audit trails for the last 1500 access attempts, manage users and eLocks, and assign time-based restrictions and dual credential access. Downloading and uploading information is easy. Simply attach one end of the RJ-11 cable to the back of the CompX eLock® and the other end to a laptop computer – no need for expensive hardwired systems.

- ➔ Add, edit, view and delete users / supervisors and their credentials
- ➔ Add, edit and delete CompX eLocks®
- ➔ Assign access rights between users / supervisors and CompX eLocks® in the database
- ➔ USB connection required
- ➔ Download, view, save, print, archive and delete audit trails
- ➔ Dual credential access available
- ➔ Programmable lockout feature
- ➔ Set real time clock
- ➔ Time based access restrictions
- ➔ Create user groups
- ➔ Windows™ based

NEW!
Fully field upgradeable!
 Modify the CompX eLock® membrane keypad for any use.
